

Koneru Lakshmaiah Education Foundation

(Deemed to be University estd. u/s. 3 of the UGC Act, 1956)

Off-Campus: Bachupally-Gandimaisamma Road, Bowrampet, Hyderabad, Telangana - 500 043.

Phone No: 7815926816, www.klh.edu.in

DEPARTMENT OF CSE

PROJECT ABSTRACT SUBMISSION

COURSE: ADAPTIVE SOFTWARE ENGINEERING (24CI3201)

A.Y. 2026 - 2027

TITLE OF THE PROJECT		
S. No.	University ID	Name
1	2420090039	Sanchay Krishna G
2	2420030406	K. Narasimha Sai
3	2420030243	M. Hari Haran
Name of the Guide		Kalidindi Bhavya Varma

Abstract:

VeriCode AI is an AI-powered Secure DevOps platform designed to automate code review, code quality assessment, vulnerability detection, and secure software deployment. Traditional software development often relies on manual code reviews and separate security tools, which can be time-consuming and may result in vulnerabilities being detected at later stages. VeriCode AI addresses these challenges by integrating Artificial Intelligence, DevSecOps, and CI/CD automation into a unified platform.

The system uses an LLM-based AI component to analyze source code, identify potential coding issues, explain detected problems, and provide recommendations for improvement. Security and quality analysis are enhanced using tools such as SonarQube, Trivy, and OWASP ZAP. The project integrates Git/GitHub and GitHub Actions to automate the software development pipeline, while Docker and Kubernetes support containerized deployment. Prometheus and Grafana are used for monitoring and visualization. The platform aims to detect issues early in the Software Development Life Cycle, reduce manual effort, improve software security and quality, and enable reliable automated deployment.
